CONSTITUTION
OF
WESTERN PIGEON FEDERATION OF VICTORIA INCORPORATED

1. NAME

The name of the incorporated association is Western Pigeon Federation Incorporated.

(In this Constitution and the Rules called the **WPF**)

2. PURPOSE OF WPF

The WPF is the peak body for the administration of homing pigeons in the Western suburbs of Melbourne and such other areas as the Board of Management may determine from time to time.

The purpose for which the WPF is established and maintained is:

- (a) The protection and improvement of Homing Pigeons and in particular the sport of racing pigeons in the Western Suburbs of Melbourne and for the encouragement of Federation races.
- (b) To raise the funds necessary to pursue the above in such a manner as deemed possible and necessary by the Board of Management.
- (c) To support Members in all matters pertaining to racing pigeons
- (d) At all times to act on behalf of, and in the interest of the members and the WPF:
- (e) Represent the interest of the members and of WPF generally in any appropriate forums:
- (f) Encourage, conduct, promote, advance and govern the WPF:
- (g) Promote the health and safety of Racing pigeons participating in the WPF in any capacity:
- (h) To support members in a non-financial capacity.

3. POWERS OF WPF

Solely for the furthering the purposes set out above the WPF has, in addition thereto, the rights, and power conferred on it under the Act. (Associations Incorporation Reform Act 2012).

The person setting the clock must then write his name between the two (2) completed stamps and the clock tape must then be torn between the two (2) stamps and through the clock setter's name. The clock tape ends are then placed in an

envelope, which is sealed when clock setting is complete and forwarded to the WPF Secretary at the WPF rooms on basketing nights with the entries or before clocking.

- 8.8 There is to be at least twenty (20) minutes between the first (1st) pullover and the second (2nd) pullover when setting clocks and the second (2nd) pullover is to be on the even five (5) minutes.
- 8.9 When all clocks leave the clubrooms they must have hole two (2) showing unless otherwise sanctioned by the WPF.
- 8.10 All clocks competing in WPF races must be sealed with numbered seals and the numbers of these seals are to be recorded after clock setting and after clock pullover prior to clock opening, on separate sheets which will be forwarded to the WPF Secretary on race nights with the WPF clock sheets. All clocks are to be sealed only with materials supplied by the WPF.
- 8.11 **DOLONEEERS**
All clocks when being set shall have the dolometer set to zero (0). Any movement of the dolometer between zero (0) and ten (10) is considered normal movement of the clock, however, any movement in excess of ten (10) indicates a fault within the clock which will need to be rectified before the clock is used again.
- 8.12 All clocks be **set as running clocks**

CLOCK PULLOVER AND READING

- 9.1 Any member, after clocking, desirous of having his clock checked against the chronometer may make personal application to the Chronometer Steward for such purpose, however the clock must run for thirty (30) minutes before the Chronometer Steward will pull the clock over.
- 9.2 A thimble must be used with a thimble clock. Early model La Ledoise clocks that do not have a plastic cover over the barrel holes and all Super Toulet clocks shall be used with a thimble in all WPF races. All other makes of clocks currently being used shall be used as directed by the manufacturer. All new makes and models of clocks must be approved for use by the Board before they can be used in WPF races.
- 9.3 **FAULTY CLOCKS**
If a members clock is found to be faulty or has stopped prior to clocking then a spare club clock, set for that race, can be used. In the event of any clock being found faulty prior to a race pigeon homing, the member may, clock his pigeon in any clock that has been set by the Clock Committee for that race. The faulty clock is to be produced to the WPF Clock Committee after the race before that clock is used again in a WPF race.
- 9.4 If a wrong pigeon is clocked the member must notify a Club Clock Committee member or Club Secretary before the clocks are opened.
- 9.5 A deadline of 8.30 pm has been set for all chronometer checks.
- 9.6 In the event of a clubs chronometer stopping, the club concerned will ring the WPF rooms or the nearest club to effect a pullover of the clubs clocks. The stopped chronometer shall be

forwarded to the Clock Marshall who shall examine the chronometer and advise of the reason for the stoppage.

- 9.7 All clocks competing in WPF races up to and including the five hundred and sixty (560) kilometer stage (generally accepted as 350 mile stage) shall be presented after clocking at the appropriate clocking centers within one and a half 2Hrs hours after clocking. For all races in excess of the five hundred and sixty (560) kilometer stage clocks shall be presented at the appropriate clocking centers at 8.00pm or one and half / 2 Hrs after clocking whichever is the greater.
- 9.8 In the event of pigeons being clocked on the day following liberation, all clocks are to be presented at 7.00 pm however the one and a half hours will still prevail if the pigeons are clocked late.
- 9.9 The Club Chronometer Steward ONLY is allowed extra time required to produce his clock.
- 9.10 At the clock checking time at the conclusion of a race all clocks are to be pulled on the even five (5) minutes for the first (1st) pullover If the clock does not have a print for every hole showing then the clock will be automatically disqualified.
- 9.11 At the production of clocks after a race, all clocks must be produced and they will be struck against the WPF master timer or club chronometer after checking against the WPF master timer and thus obtain the total variation, which shall be added or deducted in the usual way except in the event of gaining at a rate of more than five (5) seconds per hour, the registered Arne on the tape will be taken as the time of arrival, and in the event of a clock losing at a rate of more than five (5) seconds per hour, double the varied slow is to be added to the registered time. In the event of a clock ceasing to work after the pigeon has been clocked, the clock the event of a clock ceasing to work after the pigeon has been clocked, the clock shall be deemed to be a slow clock.
- 9.12 The hole number showing in the clock prior to opening must be written on the WPF clock sheet along with clock number and loft number
- 9.13 Unless in the opinion of the Board a clerical error has occurred, the number on the rubber race ring produced from the clock must correspond with that on the entry form.
- 9.14 Any false reading or irregularity on the clock tape or with the clock must be fully explained on the clock tape or WPF clock sheet on the night of the race.
- 9.15 The hole number showing in the clock on the night of setting must be the same numbered hole which contains the rubber race ring at the reading of the clock. If the rubber race ring is not in the hole showing on the night of setting the clock tape will be read on the hole which contains the rubber race ring.
- 9.16 That if the clocking print that matches the hole number the rubber ring comes out of is unreadable, for whatever reason then the next readable print will be read.
- 9.17 All clock tapes must bear the name of the member, his loft number, his club, the race point, the date and the signatures of the Clock Committee members who set and checked the clock. The clock tapes must have two (2) puncture marks only, one at the beginning and one at the end both circled and initialed by a Clock Committee person and the hole number containing the rubber race ring noted. Clocks must be checked for variation on the night of setting and noted. All clocks must be sealed on the night of setting with a numbered seal which shall be intact on return to the club. Sealed clocks must run a minimum of twenty (20) minutes from the time of starting before the time check pullover.

Should the above requirements not be strictly adhered to, the member will be automatically disqualified except where the member's club is deemed to have made a clerical error. In which event the Board may alternatively fine the member's club the sum of twenty (\$20.00) dollars and for every error during the current season the fine may be increased by twenty (\$20.00) dollars.

- 9.18 All clocks will be read to the nearest second. If the second is split then the reading is made on the proximity to the nearest second.
- 9.19 All velocities are to be calculated on the system of seconds and meters reduced to sixtieths (60ths).
- 9.20 The WPF Board of management has the power to impound any clock which they suspect may be faulty.
- 9.21 All clocks running greater than 30 seconds fast or slow in 24 hours be given to the Clock Marshall for correction. If they continue to run at greater than 30 seconds fast or slow they will have to be repaired.
- 9.22 If a clock stops the clock can be opened by the Clock Marshall and the rubber removed and clocked in another clock set for the race. If the Clock Marshall's clock stops the President of the Federation will act as the Clock Marshall.
- 9.23 All clocks set for the last race of the season must be presented for pullover Flyers not presenting their clock may be fined.
- 9.24 All paperwork relating to a race is to be placed within a large envelope and sealed with Club, date and race point. The rubber rings of all clocked birds shall be placed back on the tags and stapled to the right hand top corner of the entry sheet. The clock tape shall be stapled to the left hand top corner of the clocking sheet.

DECIDING RACES

- 10.1 Races up to three hundred and seventy (370) kilometers shall close at dark on the day of liberation, from three hundred and seventy (370) to six hundred and fifty (650) kilometers at dark on the day following the day of liberation, from six hundred and fifty (650) to eight hundred and twenty-five (825) kilometers at dark on the third day including the day of liberation, over eight hundred and twenty-five (825) kilometers at dark on the fourth day including the day of liberation. In the event of a race not being won within the specified time the Board shall have the power to extend the time as required.
- 10.2 (a) In the event of no pigeons being clocked on the day and no pigeons being clocked until after sunrise on the second day the race will close at sunset on the first day and re-open at sunrise on the second day.
(b) In the event of the Federation not being filled on the day the following will apply; the race will close at sunset or half an hour after the last pigeon is clocked whichever is the latter and it shall reopen at sunrise or half an hour before the first pigeon is clocked whichever is the earlier.

- 10.3 If only one (1) pigeon is clocked in race time, then the member racing this pigeon will only be credited the first place points on the WPF aggregate and all the prize monies but the pigeon must be in the pools to be eligible for the pools money otherwise the pools money will be refunded.
- 10.4 In races in excess of six hundred and forty (640) kilometers (400, 500 and 600 allies) any member may clock two (2) pigeons, both of which may be eligible for federation positions but only the first pigeon clocked will be eligible for prize money and WPF aggregate points.
- 10.5 All pigeons must fly to a members loft and be the absolute property of the member in whose name they are raced and be shown within twenty four (24) hours of the close of the race alive, if required, to the appointed representative of the WPF, who shall have the power to liberate the pigeon(s) at the members loft, and such pigeon(s) must return to the members loft in his presence. Any infraction of this rule shall annul all rights to prizes and future competition in WPF races. The WPF shall be at liberty to send a representative to investigate the legitimate ownership of any pigeon, the expense of such investigation as fixed by the WPF to be borne by the defaulting member and to be recoverable as and for liquidated damages.
- 10.6 **VERIFICATION OF PIGEONS**
In all Federation races including the Breeders Plate race only the first (1st) position pigeon and two (2) other position pigeons, randomly selected and gaining prize money in the race are to be verified by a Board Member. Extra pigeons may be required to be verified if it is deemed necessary by the Board. All Section winners to be verified each week by the club secretary all birds must be reported to the ring secretary no later than 24hrs after the race. to avoid disqualification.
- 10.7 If after the third decimal of any velocity, two or more members velocities are even, then such members shall be deemed to have the same velocity and shall equally share the value of the prize money for those positions.
- 10.8 The names and details of clocking of all members eligible for any Federation and Section positions should be entered on the WPF Clock Sheets presented to the WPF Secretary at the end of a race. Should the above requirements not be strictly adhered to, the Member will be automatically disqualified except where the member's club is deemed to have made a clerical error. In which event the Board may alternatively fine the member's club the sum of twenty (\$20.00) dollars and for every error during the current season the fine may be increased by twenty (\$20.00) dollars.
- 10.9 The official result of a race will be on the next basketing night following a race. Members have fourteen (14) days from this time in which to lodge an appeal to this official result.
- 10.10 Should any member be credited by the WPF Secretary with having such velocity as the Board considers impossible on the day, then the Board shall have the absolute power to disqualify the said pigeon in the said race, although there may be no evidence to suggest or support any fraudulent practice of the member or any other person for marking or dispatching of the pigeon to or at the race point.

11 **PROTESTS**

Protests of any description against any official result must be accompanied by a deposit of twenty (\$20.00) dollars and must be made through the club that such member is represented' rough, within seven (7) days of the declaration of the official result of that race, and if the said protest is considered frivolous by the Board the deposit shall be forfeited.

PAYMENTS

12.1 **ACCOUNTS**

All accounts rendered on clubs or members must be paid within fourteen (14) days of the date of issue of the account. Accounts not paid within fourteen (14) days will incur a fine of twenty (\$20.00) dollars. Failure to pay the account and fine within twenty-eight (28) days of the date of issue of that account will render all members of that club or that member ineligible to compete in WPF races until such account is paid.

12.2 **PRIZEMONEY**

All prize money and pools will be paid to the members fourteen (14) days after the official result of the last race for the current racing season is posted. Prize money will be paid on the basis of one (1) position for every ten (10) or part thereof members competing at the beginning of that racing season. Pools will be paid on the first three (3) pooled pigeons clocked with only one (1) pigeon per member being eligible for pool money.

RULES AND CONDITIONS OF INSTALLATION AND USE OF ELECTRONIC BAND SCANNING SYSTEMS

13.1 The use of Electronic Band Scanning Systems ("EBSS") is approved by the Western Pigeon Federation ("WPF") for use in all races conducted by the WPF

13.2 In the event that the WPF Board of Management ("BOM") determines that an EBS System or a system design does not provide adequate security or presents a potential security question, the WPF may disapprove the use of that system. The disapproval of any system will be effective immediately upon resolution on the WPF executive committee and the disapproval will be advised lb the members as soon as reasonably possible by personal notice.

- a) The WPF reserves the right to withdraw the approval of any EBSS at any time, if lack of security occurs with a particular system.
- b) If the, WPF BOM determines that a lack of security exists with any individual unit, the BOM will do an immediate statement as to the validity of the continued system the BOM must provide a written statement of the reason for concern to the system owner
- c) Issues of the potential or actual adequacy or otherwise of the security will be a matter for determination by the WPF BOM within its absolute discretion.

13.3 Use of an EBSS by an individual WPF member must be notified to the WPF in writing by the member's respective affiliated club.

13.4 A WPF affiliated club shall not make use of an EBSS mandatory.

- 13.5 A member is free to purchase any EBSS he chooses. A member is responsible for ensuring the system (hardware/software) is compatible with other systems used by the WPF or the member's affiliated club. The WPF or the club shall have no responsibilities for any system incompatibility.
- 13.6 It would be advisable for any member, prior to purchasing an EBSS system, to check with the WPF as to what systems are already in use.
- 13.7 The serial number of each EBSS and the serial number of each antenna must be approved by and registered with the WPF prior to use.
- 13.8 Installation of the EBSS in a member's loft must be inspected and approved by the WPF president before being accepted for competition use within the WPF.
- 13.9 Electronic pads must be underneath the common roof line and build into the face wall of the loft. The sensors/antennas of an EBSS must be within the entrance of the loft. (This includes an entry into the face wall of the loft, as long as it is considered the entrance.) (Adopted at 2016 AGM)
- 13.10 Every sensor/antenna must be sealed as a fixture at the point of entry; Point of fixture shall be documented.
- 13.11 Multiple entries are permissible, same rule as to apply as normal rubber ring clocks. Distance measured to centre of traps.
- 13.12 No sensor/antenna may be employed or placed at the loft another competitor or moved to any other position of the competitor's loft without the prior application to, and approval by the WPF.
- 13.13 System control modules or system keys and software used in EBS systems shall be purchased or procured by the system owner.
- 13.14 Users of EBSS must:
- a) Use an electronic band scanning system that has a re-programmable electronic band.
 - b) Use electronic bands that have read/write chips. Currently the use of 64k/128k bit chips are approved for use.
- 13.15 The president or secretary of each competing club shall secure all individual system control modules or system keys during competitive events. The use and operation of these security controls shall only be permitted by individuals specifically authorized by the WPF during competitive events.
- 13.16 It shall be the responsibility of each individual competitor to affix or attach electronic bands securely to each of his birds making sure that the band's locking mechanism is securely engaged. He is then required to print out an assignment report of all his birds' life rings and band numbers and submit one copy to the WPF secretary 7 days before the first federation race. After this list has been submitted, no bird may be added, however, faulty rings may be replaced. Whenever a ring has been replaced a new list must be submitted before the bird is raced again.

- 13.17 The Club and the WPF shall retain a copy of the report in its records and another copy shall be delivered to the competitor as his verification of eligibility of each bird.
- 13.18 During the logging process, all band data must be reviewed to ensure band data accuracy.
- 13.19 After all race birds have been entered in an EBSS, the club president, secretary or room steward shall print a list of the competitor's entries as verification of all birds entered. The printout shall be signed by the president, secretary or room steward and the competitor.
- 13.20 The printout serves as a race entry sheet. An additional copy shall be printed for the competitor.
- 13.21 In the case where an electronic race sheet shows a tie, the first bird listed will receive the highest ranking of the tied birds and so forth, down the list
- 13.22 If data contained in the EBSS becomes defective, erases, or corrupted between race entry and the return of pigeons to the competitor's loft, all entries for that competitor shall be disqualified from the race results. The WPF BOM will verify the system failure.
- 13.23 If the EBSS has a continuous clocking function, then that function is approved for use subject to normal clock presentation procedures.
- 13.24 (a) In the event of a malfunction of an EBSS and it being sent for repair, proof of repair must be produced before the EBSS can be used for competition again.
(b) In the event of the removal of the sensor/antenna for any reason, the sensor/antenna reinstallation must be approved by the WPF before the EBSS can be used for competition again.
- 13.25 When closing the race, the club president, secretary or clock chairperson shall print out all data prior to transferring data from the EBSS to the computer. The printout will serve as a back-up document for later reference if necessary. All data files should be stored on a diskette in the event data reconstruction becomes necessary but none of the WPF, the WPF executive committee or other race officials has any liability whatever for any act or omission including, without limitation, loss or corruption of any data. Use of an EBSS is at the sole risk of the member or competitor using it.
- 13.26 (a) should the EBSS display (after a race entry or race) show the complete set, but not be able to generate a printout, the WPF BOM shall view the display data and report it manually. The manual report shall be used for calculating race results.
(b) In the event of it being a WPF controlled race and a printout cannot be generated from a member's timer/recorder, the timer/recorder must be produced for manual reading by the WPF on the day or night of the race. Failure to produce the timer/recorder will result in the non acceptance of the member's result.
- 13.27 The WPF BOM or its designate reserve the right at any time, without prior notice to inspect the installation and operation of any EBSS being used by a competitor within the WPF.

- 13.28 Any application form adopted by the WPF BOM from time to time forms part of these rules and conditions.
- 13.29 The WPF BOM may from time to time amend these rules and conditions as it thinks fit and within its absolute discretion.
- 13.30 These rules and conditions are supplementary to and must be read in conjunction with the current WPF racing and clock rules. To the extent of any inconsistency, the latter shall prevail

WESTERN PIGEON FEDERATION

CODE OF PRACTICE

All members are bound by its requirements. It must be studied carefully and is to be read in conjunction with the Constitution and Rules of the Association or Club, hereinafter referred to as "the Association."

The Code is based on the original Code developed by the Racing Pigeon Federations of South Australian Homing Pigeon Association and modified by the WPF. 2017 Pigeon owners, who are not members of the Association are not bound by this Code. The Association cannot be held responsible for any actions, or behavior, by non-members of the Association.

The principal effect of this Code is to ensure the welfare of the pigeons remains the prime consideration in all activities associated with the sport of racing pigeons.

The main issues the Code focuses on are:-

1. Housing and environmental factors affecting health.
2. Racing and training practices, especially as they affect the chances of an individual pigeon returning safely to its loft.
3. Transport of pigeons to races and training flights.
4. Control measures to enhance the ability of a pigeon to return safely to **POLICY**

Under the broad umbrella of pigeon welfare, the Association identifies certain aspects and practices which are inherent to the operation of this Code.

The Racing Pigeon is a domestic animal and occupies an appropriate place alongside other domesticated species, within the general Australian Community.

Notwithstanding the need for adequate exercise required to enhance the health and performance of the racing pigeon, as a domestic animal, the Racing Pigeon should be regulated sufficiently to ensure its place within the urban community environment. As a consequence:-

- a. The Racing Pigeon should be exercised daily, sufficient to ensure its fitness for the purpose intended. With the exception of birds owned by fanciers living away from built up metropolitan housing Estates, or, for when pigeons are returning from racing and training, free flight exercise is to be on a planned basis. Duration typically from 30 - 90 minutes, and performed to a maximum of twice daily.
- b. Free non-flight time, at any time, is to be conducted under close supervision by the owner. Other than for planned free flight and non-flight times, all racing pigeons are to be confined within their home loft. Persistent fielding and/or roof sitting habits are prohibited.
- c. The Racing Pigeon should be housed within a loft, designed to provide shelter and comfortable accommodation for its inhabitants, and built in such a manner as to ensure it does not negatively impact upon the amenity of the environment in which it is located and so that it maintains the public dignity and image sought by the Pigeon racing fraternity.

1. DUTY OF CARE TO PIGEONS

People who own or are responsible for the care of racing pigeons have a fundamental duty to take all reasonable steps to ensure the welfare of those pigeons.

2. ILLTREATMENT OF PIGEONS

The Association defines ill treatment of pigeons as injuring, tormenting or torturing, causing unnecessary pain, stress, neglect or suffering whether through overcrowding, lack of food or water or otherwise. These acts are considered by the Association as unacceptable treatment to pigeons and a breach of the Code.

3. ACCEPTANCE AND INSPECTION OF PIGEONS FOR COMPETITION

- 3.1 The Association acknowledges the depth of member expertise in pigeon care from which suitably experienced personnel for the inspection of pigeons submitted for competition can be appointed.
- 3.2 The Association will appoint persons annually to act as Stewards for the inspection of any pigeons submitted for competition.
- 3.3 Pigeons must be referred to the Steward by handlers if they have any suspicion that the pigeon is not of sound health and physical well being to successfully participate in the race entered.
- 3.4 The Steward retains the right to refuse an entry, without challenge, on the grounds of poor health, physical impairment, or neglect, if he considers its opportunities to return safely are impaired or the pigeon is a health risk to other entries. Such refusals are to be documented by the Association for action as necessary.
- 3.5 Poor pigeon health can be described as a pigeon having symptoms such as a general lethargy, breathing difficulties, nasal and eye discharge, pigeon pox lesions and the like.
- 3.6 Neglect can be described as the pigeon being presented in a soiled and generally disheveled condition and/or harbouring external parasites, or inadequately healed wounds.
- 3.7 Physical impairment is intended to cover any condition, which is likely to diminish the chances of a racing pigeon to successfully complete a race entered such as injuries, scaring, bruising or insufficient feathering.

4. TRANSPORT OF PIGEONS

- 4.1 The carriage of pigeons is to be made in baskets or units that allows for adequate air exchange and for the pigeons to view their outside surroundings.
- 4.2 The Association recognizes private pigeon carry baskets, crates or units are constructed in many sizes to suit individual circumstances, such as vehicle configuration.
- 4.3 The minimum height for all containers for the carriage of pigeons, whether owned by the Association., or otherwise, is 21 cm (8") and is exclusive of all wire and plastic mesh bottom inserts.
- 4.4 The space allowance per pigeon will vary according to the time such confinement is in force, the distance of the race or toss and the need for feeding and watering of the pigeons *en route* and at the liberation site.

- 4.5 This space allowance relates to pigeons being taken used for private training, Association training and/or racing, or for the conveyance of pigeons to the clubrooms for entry into competition.
- 4.6 For daytime confinement of short duration of up to two hours generally accepted space allowances should be respected eg. 15 bird basket no more than 15 birds.
- 4.7 Overnight confinement of 19 hours or less duration, and/or the race journey is 350 kilometers or less - measured from the loft of the longest distance competitor, allow a minimum of 250 cm² per pigeon. For competition events, the confinement period commences at the club starting time for acceptance of pigeons for entry.
- 4.8 Confinement in excess of 19 hours or 350 kilometers, allow a minimum of 300 cm² per pigeon per basket, so as to ensure the pigeons can achieve the normal reclining position, typical for extended travel.
- 4.9 An example of permissible pigeons per tier measuring 1200cm x 900cm (4 feet x 3 feet) is as follows:-
- Friday night basketing (one night confined in tier) 35.
 - Thursday night basketing (two nights confined in tier) 30.
 - Wednesday night basketing (three nights, or more, confined in tier) 25.

5. FEED AND WATER PROVISIONS UNDER RACE CONDITIONS

- 5.1 The Association considers there exists a balance between the need to feed and water the pigeons *en route* and at the liberation site, to sustain reserves of energy to complete the journey, and the need to avoid the detrimental effect, of commencing a journey on a full crop. On this basis it is determined, that for up to **19** hours confinement, *en route*, involving an overnight journey, and the race is 350 kilometers or less, measured from the longest competitor, no feed provisions are mandatory. Provision must be made for the supply of water to pigeons competing in all races.
- 5.2 Where the confinement is expected to exceed **19** hours or the journey is in excess of 350 kilometers provision is to be made to feed and water the pigeons.
- 5.3 When feeding and watering of the pigeons is required, the Association shall arrange for entries to be accepted at such a time that will ensure that the Transporter will arrive at the liberation site by at least 1600 hours on the day before the event is to start. In these cases, feed and water procedures are to commence as soon as practicable after arrival. The feed is to remain in front of the pigeons for a minimum of one hour and not more than three hours, whereupon it shall be withdrawn. The water shall remain available for the pigeons continuously until at least one hour before liberation.
- 5.4 Feed and water *en route* is to be given by 1600 hours daily where the journey time to the liberation site exceeds the 1600hour arrival time.

6. PERFORMANCE ENHANCING DRUGS: DRUG FREE RACING

- 6.1 Because of the significant time delay between the entry of pigeons for a race and actual time of liberation, many performance enhancing drugs illegally used in other contests are fortunately rendered in-effective for pigeon racing. It is however, policy that pigeon racing remains free of any administered performance enhancing drugs and this has particular reference to the use of any of the corticosteroids. Any competitor found to have entered a

pigeon administered with any performance enhancing drugs will be held responsible and be dealt with by the Association. Any pigeons found sick or dead within the baskets at liberation can be sent for analysis. Where any inappropriate performance enhancing substance is detected, the owner(s) will be held responsible and the matter dealt with by the Association.

- 6,2 The Association shall have the right to conduct random testing of droppings for the presence of cortisone. If a flyer refuses to produce a bird for testing the bird shall be deemed to have produced a positive test result.

7. THE PIGEON "LOFT"

- 7.1 The Association recognizes pigeon lofts are constructed in many sizes to suit or fit individual circumstances, such as available space within a conventional residential block, and it is not intended to interfere with this freedom. Instead, the Association encourages members and affiliates to be aware that to participate in the sport of pigeon racing as a member of the Association is a privilege. This privilege may be revoked in the event a loft housing pigeons belonging to a member is not maintained and improved from time to time, in such a manner as to keep the public image of the sport intact, and the amenity of neighbors and indeed the health and welfare of the pigeons foremost.

- 7.2 The racing loft houses birds which are generally released for exercised once or twice daily. Such lofts need not conform to any specific size or design except to comply with health and amenity requirements and to local council laws.

- 7.3 The stock bird loft is used for housing the breeding pigeons of the loft and because of their value and likely background of racing from some other inter or intra state lofts are not able to be freed for exercise. These pigeons require more space than race pigeons for their good health and well being. The stock loft shall generally be of similar configuration as the racing loft, except, in the place of box perches, breeding compartments are provided. Typical dimensions for breeding compartments are 550 mm wide x 450 mm high x 500 mm deep (22" x 18" x 20"). Adequate space to maintain health and well being of pigeons within the breeding loft may be calculated by the following formula:

Loft dimensions 1800 mm wide x 2100 mm long x 1800 mm high (6' x 7' x 6') = 6804000 cm³ divided by (92000 cm³ x 2.5) = 30 pigeons, (or 15 mated pairs) for the space provided. For the same sized race loft no more than 40 race pigeons should be housed.

- 7.4 The following is provided only as a guide but reasonably reflects the hallmarks of a well-organized and well-constructed pigeon racing loft.

The loft needs to be dry and warm over the winter months. For the summer heat the loft needs to have ventilation such as flaps and ventilators that can be adjusted and dosed off as the winter approaches. The loft needs to be designed for ease of cleaning and for the comfort of the pigeons and box type perches are most suitable for both. Where practical, it needs to be sited on the lot so the front of the loft faces away from prevailing winter winds and rain, whilst making full advantage of the morning winter sun.

- 7.5 Box perches are the standard method of providing perching facilities for racing pigeons. These must be of sufficient dimensions to allow the bird to comfortably rest. Alternate styles of perching may be suitable, particularly "V" perching. "Plank" or "dowel" perching as seen in small bird aviaries, is unsuitable for racing pigeons, and is to be avoided unless it

- forms part of an aviary attachment to the loft.
- 7.6 There needs to be adequate air exchange within a pigeon-racing loft without causing drafts. Under and over floor ventilation promotes essential dryness required for a healthy loft. Gabled type roofs are encouraged to cater for adequate air displacement. Where a gabled roof is not provided, an opening at ceiling height at the rear to the outside, of no less than 100 mm (4") along the full length of the loft, is to be provided. Alternatively, a 'witches hat' type chimney or similar ventilator or extractor should be placed centrally within the roof to affect the required air exchange and to promote good health and comfort for the pigeons.
- 7.7 It is recognized that in some municipalities regulations exist for pigeon lofts. Where these regulations are in conflict with the Code the Association will make appropriate representation to those authorities, seeking their cooperation and assistance in the interests of overall conformity.
- 7.8 All new lofts constructed off-ground, shall have a minimum height from the ground to floor level of 200 mm (8"). Allowing for free flow of air under floor unless the floor construction is a concrete slab.
- 7.9 Floor Areas may be either:-
- (a) Trafficable mesh grating floor, allowing for droppings to pass through for collection from below floor level.
 - (b) Trafficable timber floor with suitable moisture absorptive qualities, and for regular ease of cleaning eg. Chip board, plywood.
 - (c) Concrete slab floor (where concrete is utilized, a heavy-duty plastic must be laid underneath at pouring).
 - (d) For the health of the pigeons, external open aviaries and or sun yards are desirable.
- 7.10 For the welfare and comfort of pigeons, where external cladding of a loft consists of brick, metal, or cement sheeting, such lofts shall ideally be internally lined with plywood, chipboard, or 'other heat retaining materials. For prevention of condensation dampness, all metal roofs should be insulated.
- 7.11 Members should aim to be consistently improving their pigeon lofts.

8. LOFT CLEANING

- 8.1 Where above floor compartment droppings remain permanently dry and in a semi powdered form and are of 25 mm (1") thickness or less, these are not considered a health hazard to either pigeons or humans.
- 8.2 Deep litter, unless of a substance(s) approved by the Association, is not encouraged. Where however this method of loft floor dressing is utilized, the loft must be designed with sufficient weather protection to ensure the litter can remain permanently dry. This material must be regularly raked over to maintain both neat appearance and the biological activity with aerobic breakdown of organic matter.
- 8.3 Loft floors are to be cleaned and droppings removed or raked over as above on a minimum basis of once per week. Removed droppings are to be placed in a covered receptacle in a dry location protected from access to flies and vermin, prior to removal from the property site or appropriate garden use as fertilizer.

9. FEED AND WATER

- 9.1 The Association recognizes there are many successful methods for feeding of racing pigeons and it is not intended to regulate this activity -other than to document normal feeds and feed practice.
Essentially, racing pigeons thrive quite effectively on most grains including peas, maize, sorghum, wheat, oats, rice, barley, pellet preparations and small grains. The normal feed regime for racing pigeons is twice daily given after exercise. Feed is to be kept dry and in vermin proof containers and not left in the lofts overnight.
- 9.2 Clean water in the home loft, available at all times, with or without medications, or vitamin and mineral additives, is essential. Water should be changed daily

10. NEIGHBOURS

A member shall attempt to resolve any neighbors concerns or complaints in respect of the pigeons such as, time of exercise around the loft, and do all that is reasonably possible to avoid conflicts arising.

11. STRAY BIRD MANAGEMENT

The Association recognizes appropriate management of lost or injured pigeons belonging to members is a critical part of our objectives to foster the welfare of our pigeons. Failure to report a stray pigeon or collect reported pigeons will be viewed very seriously will result in a fine, suspension or cancellation of membership.

12. LOCAL COUNCIL LAWS

Members shall make themselves aware of local council laws and planning laws related to keeping racing pigeons and ensure that their lofts, cleaning, food storage, exercise times and other council requirements are met at all times.

A person must not place or transport an animal in an enclosed boot of a sedan motor vehicle

13. PENALTY FOR BREACH OF CODE

Where this Code is adopted by the Association as part of its rules or regulations a breach of the Code, depending on the severity of the breach, will result in either a fine, suspension or expulsion from membership

2017 PRESIDENTS REPORT

In spite of the many different problems facing pigeon racing at the moment, Rota Virus being one of them, the Board of Management have once again ensured that the WPF has had yet another successful year. In my opinion our very cohesive Board of Management, made up of members who are committed to seeing our racing seasons being as successful as possible each year, has been the main reason for this ongoing success.

The Board this past year was made up of myself, Michael Portelli, Charlie Abela, Joe Farrugia, Joe Pulis, Felix Lia, Charlie Montebello, Steve Cutajar, John Saggars, Ray Armstrong, Mario Bonnici, Alex Kalaitzis.

Our birds made their way home each week in the best possible conditions thanks to the hard work and dedication of the Liberation Committee, Michael Portelli and Alex Kalaitzis. On behalf of all our members I would like to thank them both for their commitment to their job.

As always, a special thanks goes to our transporter Wayne Harker and John Cassar who week after week took special care of our birds ensuring they were released well rested and fuelled for their trip home.

Once again this year, we have two special women to thank for their tireless work behind the scenes. Pauline Pulis, our Ring Secretary for keeping track of over 16,000 rings and the pigeons who wear them and Alison Portelli for keeping both our web site and results page accurate and up to date and for also keeping all members notified of important news by phone text week after week.

We held a very successful Breeders Plate once again this year, with Frank Briffa of the Werribee Club taking out the \$30,000 first prize.
